

Danwei Cai

Seattle WA | (425)606-9811 | cai.da@northeastern.edu | danweicai.github.io

EDUCATION

Northeastern University, Seattle, WA

Sep.2022- Dec.2026

Master of Science in Information Systems, GPA:3.8/4.0

Relevant Courses: *Data Structure & Algorithms, Database Design, Web Design and User Experience Engineering, Smartphones-Based Web Development, Network Structures and Cloud Computing*

SKILLS

Programming Language: Java, Python, Terraform, Packer, C++, Flutter, JavaScript, HTML, CSS

Database: MySQL, MongoDB, DynamoDB, PostgreSQL

Cloud Platform: GCP cloud, DevOps, AWS

WORKING EXPERIENCE

IpsierLab Startup | Software Engineer Intern, Mountain View, CA

Sep – Dec.2024

- Developed an internal back-end service, using Java, JDBC, PostgreSQL and React

Project

Job Search Copilot | Open-Source Agent Skill

Sep. 2026

Repo: github.com/DanweiCai/job-search-copilot

- Published a local-first, human-approved workflow for Codex and Claude Code that supports live-role discovery, fit scoring, truthful resume tailoring, application review, submission verification, and job-search tracking.
- Designed candidate-safety controls that keep fires in a private workspace, require fresh approval before each submission, and avoid inferring sensitive or legal application answers.
- Implemented Python helpers and offline tests for workspace initialization, record validation, a standalone searchable dashboard, and deterministic release packaging.

GCP Infrastructure Automatic Manager and Web Application Development

Jan – April.2025

- Built RESTful APIs for email-verified user creation, Basic Auth-protected information retrieval, and database health checks; integrated Mailchimp, a Pub/Sub-triggered Cloud Function, and API logging in GCP Logging Explorer.
- Provisioned GCP infrastructure with Terraform, including custom VPC subnets, private IP access, firewall rules, Cloud KMS, highly available MySQL backups, autoscaling instance groups, and a Cloud DNS/SSL load balancer on a custom domain.
- Built a GitHub Actions CI/CD pipeline for pull-request integration and unit tests, Packer checks, image builds, and Terraform deployments to instance groups with database credentials.

Pizza Restaurant Delivery App

Jan – April.2024

Developed a Flutter and Firebase pizza-delivery app with email authentication, menu ordering, cart and credit-card payments, real-time order updates, user data management, and receipt generation.

Game 2048 Project

Jan – April.2023

Developed a game with Java GUI, a popular single-player sliding block puzzle game. Used Java GUI to implement the logic, and used Java swing to develop the graphical user interface that allows users to interact
